## Summary

Experienced in Front-end development and web based programming with a background in HTML, CSS, Sass preprocessor, Javascript, and React JS. Possess strong skills in team building and task management that help successful companies ensure a great work environment and provide a quality service.

## TECHNICAL PROJECTS

**Luxur: Premium Bicycles** - [Github](#) | [Demo](#)

**Skills** - HTML, CSS, Sass Preprocessor

- A website for premium-quality bicycles.
- Built up HTML markup and utilized CSS grid and Sass to design responsive page layout, resulting in better user experience.
- Used various SVG's to produce professional looking icons for website sections.

**Method of Loci App** - [Github](#) | [Demo](#)

**Skills** - HTML, CSS, Sass Preprocessor, Javascript

- Implemented an application UI to practice the method of loci memory technique.
- Built page layout with HTML, and CSS, was later refactored with Sass preprocessor.
- Added functionality to buttons to randomize cards with modal popup window to display card images with Javascript.
- Stores the information added and relays all information back to user at the end of the program.

**AtoZ Cocktails** - [Github](#) | [Demo](#)

**Skills** - HTML, CSS, Javascript, React JS, external API

- Implemented an external API service to render drink data for the user.
- Build multiple page layout with react-router to navigate through different pages.
- Used global-context to fetch API data and store it for use across application.
- Programmed multiple-state values to re-render components upon changes in search-query.

## EXPERIENCE

**Assistant Team Leader, Southwest Cheese**, Clovis, NM

**April/2020-December/2021**

- Improved process parameters to save multiple 15% product loss instances that were occurred every third shift.
- Helped develop new training curriculum to reduce quarterly injuries by 12.5%.
- Assisted team during times of hiring shortages by taking over any missing positions on the team.

**Personal Trainer, Anytime Fitness**, Englewood, CO

**June/2017-June/2018**

- Implemented new challenge structure to increase monthly member attendance rates by 20%.
- Changed the equipment flow/layout to free up space for extra machines/more room per machine.
